Nanya Technology Corporation

2024 Business Report

I. 2024 Business Report

(I) Operations:

Nanya Technology Corporation's (hereinafter referred to as "Nanya") consolidated revenue amounted to NT\$34.13 billion in 2024, up approximately 14.2% compared to the NT\$29.89 billion in 2023. The after-tax loss was NT\$5.08 billion, the net profit margin was -14.9%, and the loss per share was NT\$1.64.

In 2024, the DRAM product market was polarized due to end-product applications, with artificial intelligence (AI) and non-AI products at each end:

1. Annual sales volume and prices of AI-related high-end DRAM products, such as high-bandwidth memory (HBM) and high density DDR5 modules, both increased thanks to the significant growth of AI and general-purpose servers.
2. The recovery in demand for personal computers (PCs), mobile phones, and consumer products was weaker than expected, and extended the time required to digest inventory, causing demand for non-AI DRAM products to weaken in mid-2024.

AI-related HBM DRAM products require four key elements, including ① high-density advanced products (16Gb DDR5 or above), ② 3D IC through silicon via (TSV) and multi-chip packaging, ③ HBM product design, and logic IC base die.

Nanya began rebuilding our own R&D team in 2017, and have launched two 10nm generation product technologies with

our enhanced R&D capabilities. We formally began the mass production of second-generation 16G DDR5 at the end of 2024, which is the first key element to meeting HBM requirements.

We are currently actively rebuilding the second and third key elements, TSV and multi-chip packaging, as well as HBM product design capabilities. At the same time, we will build the fourth key element – integration of logic IC and HBM DRAM through strategic investment and cooperation, and expect to achieve the verification target by the end of 2026.

Shipments in 2024 were similar as that in the previous year, but the average price was slightly higher, and revenue grew by approximately NT\$4.2 billion or 14.2%. In addition, our continued efforts to control costs and expenses and reduce operating losses decreased our net losses by approximately NT\$2.4 billion compared with that in the previous year.

(II) Highlights in 2024:

1. Business promotion: Built deeper customer relationships and developed various fields of application.
 - (1) Consumer electronics products include TVs, network communications, SSD, digital cameras, set-top boxes, and automobiles, accounting for approximately 63%.
 - (2) Fields of application for low-power products include communication modules, multi-chip packages, handheld devices, digital TVs, digital cameras, voice assistants, and smart watches, and also increased shipments of in-vehicle products, accounting for approximately 21%.
 - (3) Developed PC manufacturers to increase sales channels and sales volume, accounting for approximately 13%.
 - (4) Promoted and obtained client verification and trial production orders for pilot products of

second-generation 10nm process technology (1B), such as 8Gb DDR4 and 16Gb DDR5.

2. Technology development

- (1) Mass production of DDR4 and DDR5 products based on the aforementioned 1B process technology began at the end of 2024, and the design of 3 products was completed for trial production. LPDDR4 and LPDDR5 products will be launched in 2025.
- (2) Conducted trial production of functional testing chips based on third-generation 10nm process technology (1C), and designed pilot products.
- (3) Strategically partnered with Piecemakers Technology, Inc. (hereinafter referred to as “Piecemakers”), combining the Company’s 10nm DRAM technology with Piecemakers’ product design capabilities to jointly develop customized, high-performance, low-power, ultra-high-bandwidth memory solutions.
- (4) Cooperated with Formosa Advanced Technologies Co., Ltd. to invest in the production of 3D TSV and multi-chip stacking packages.

3. Strengthening operational resilience

Adjusted the product portfolio, implemented cost improvements, and enhanced the Company’s competitiveness.

(1) Inventory management

Reduced 20-nm wafer production and actively transitioned to the 1B process. Sought opportunities to sell low-density products and reduce inventory.

(2) Lowering costs/expenses

Utilized various analysis technologies to reasonably extend the replacement cycle of spare parts for tools, reduced the use of photomasks, and improved R&D and production efficiency to reduce costs.

(3) Reducing capital expenditures

The upper limit on capital expenditures in 2024 was NT\$26 billion, but expenditures were delayed by adjusting the schedule for new plant construction, and the actual capital expenditure was approximately NT\$16.1 billion.

4. ESG and Sustainability

(1) The Company will increase the amount of green purchased by 25 million kWh each year starting from 2024 until the total amount reaches 250 million kWh. Combined with the renewable electricity purchased in 2022, annual green electricity usage will reach 50 million kWh.

(2) Nanya was once again selected as a constituent stock of the DJSI World Index at the end of 2024.

(3) Nanya received the highest rating of “A” in the climate change questionnaire of the CDP in 2024, which is an international non-profit organization, and a rating of “A-” in the water security questionnaire.

(4) Nanya ranked among Clarivate’s Top 100 Global Innovators for the second consecutive year in 2024, gaining recognition from an international evaluation institution for achievements in technological innovation and patent strategy.

- (5) Nanya continued to rank among the top 5% in the 2024 Corporate Governance Evaluation.
- (6) Nanya received an “AA” rating for ESG from the MSCI (Morgan Stanley Capital International) in 2024, and won the Taiwan Corporate Sustainability Award (TSCA) for the eighth consecutive year, recognizing the Company’s efforts to implement all aspects of ESG.

II. Industry Outlook

DRAM is a key component in making all electronic products smarter, and is also an essential product in the development of AI. It is extensively used in data centers/servers, smartphones, PCs, and consumer electronics.

Following the development of 5G and AI, cloud service providers continue to invest in AI servers with a large amount of high-end DRAM products installed. Moreover, the application of edge computing in terminal products (such as: AI PCs, AI mobile phones, and AI robots) will also increase the amount of DRAM installed and drive demand growth.

Demand on mobile phones and consumer electronics is expected to bounce back in 2025. As the inventory level of companies gradually improves each quarter, the conventional DRAM market may begin to recover in the first half of the year.

Servers shipments will continue to grow as cloud service providers invest heavily in AI servers and other companies purchase more general-purpose servers, driving shipment growth of HBM and high density DDR5 modules.

In terms of mobile phones, inventory levels are gradually returning to normal and the amount of DRAM installed is increasing due to the introduction of AI functions. Therefore, overall mobile phone shipments and the amount of DRAM installed are expected to increase compared with last year.

In terms of PCs, operating system updates have driven corporate demand for new PCs, and the amount of DRAM installed will also increase following the launch of AI PCs.

With regard to the demand for other consumer electronic products, China's stimulus plan has improved demand in the short term, and lower inventory has pushed up unit prices, but we will still need to observe the uncertainty in end demand caused by the U.S. reciprocal tariffs.

III. Business Plan for 2025

(I) Short- and medium-term strategic direction

1. Continue to develop new products and enter mainstream and high-end markets

Mass production of DDR5 products and R&D of TSV process to enter the high-density module market and develop HBM products.

2. Increase sales of low-power and low-density products to increase profits. Also develop customization and OEM markets.
3. Manufacturing equipments will be installed in the new fab based on market conditions.

(II) Business promotion

1. Promote new products of the 1B process: ① 8Gb DDR4 and 4Gb DDR4 KGD products will first be used in the mid-end TV chip packaging market. ② 16Gb DDR5 will be introduced into PCs and subsequently promoted for SSDs, network communications, and server modules, providing total solutions to achieve better performance.
2. Expand the low-power market:
 - ① Expand mid- to high-end consumer products, such as in-vehicle, voice assistants, handheld devices, smart

watches and digital TVs.

- ② Seek strategic cooperation in 5G communication applications.
 - ③ Increase market share in applications such as digital cameras, multi-chip packaging, and embedded stacked chip packaging.
3. Increase sales volume of low-density niche products: Pursue higher sales volume of digital TVs, network communications, digital cameras, KGD, and SSDs.
 4. Expand memory OEM, increase applications that use 20nm/30nm production capacity, and increase sales momentum.

(III) Technology development

1. Verification of the 16Gb DDR5 shrink version and 16Gb LPDDR4 will be completed this year, and trial production of 2 products, 8Gb/16Gb LPDDR5, will also commence.
2. The pilot product (16Gb DDR5) based on 10nm third-generation (1C) process technology will commence trial production in the second half of the year.
3. The lead product based on 10nm fourth-generation (1D) process technology will commence pilot run in the first quarter of 2026.
4. The 16Gb DDR5 shrink version will be combined with TSV process technology to produce high-density DRAM modules to meet the demand of the server market.
5. Launch the jointly development of customized, high-performance, low-power, ultra-high-bandwidth memory solutions with Piecemakers, and product verification is expected in 2026.

(IV) Capital expenditures

The upper limit of capital expenditures is expected to be NT\$19.6 billion in 2025 due to the transfer of a part of production capacity to 1B process technology, new fab construction, and R&D and general capital expenditures. The budget for production equipment will be slightly below 30%.

IV. Conclusion

Looking towards this year, the Company will actively adjust our production lines and develop high-value product lines, such as DDR5, DDR4, LPDDR5, and LPDDR4, to be profitable as soon as possible.

Nanya insists on “technology innovation” as the Company’s core value and main growth momentum, and will invest even more resources to accelerate the development of 10nm process technologies and more new generation DDR5 products to enhance our competitiveness. We will dedicate our efforts to creating greater value for our shareholders, and will fulfill our corporate social responsibility to achieve sustainable development.

Independent Auditors' Report

To the Board of Directors of Nanya Technology Corporation:

Opinion

We have audited the consolidated financial statements of Nanya Technology Corporation and its subsidiaries ("the Group"), which comprise the consolidated balance sheet as of December 31, 2024 and 2023, the consolidated statement of comprehensive income, changes in equity and cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of material accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2024 and 2023, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and with the International Financial Reporting Standards ("IFRSs"), International Accounting Standards ("IASs"), Interpretations developed by the International Financial Reporting Interpretations Committee ("IFRIC") or the former Standing Interpretations Committee ("SIC") endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Financial Statement Audit and Attestation Engagements of Certified Public Accountants and Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with The Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

1. Revenue Recognition:

Please refer to Notes 4(n) and Notes 6(q) for details on accounting policy and disclosure on relevant information, respectively.

The revenue of the Group mainly comes from sales of DRAM. Since the amount of transaction is massive and revenue recognition is considered as a great concern by the users and receivers of the financial statements, the test on revenue recognition is regarded as one of our key audit matters.

The principal audit procedures performed by the auditor for the above key audit matters include analyzing the sales transactions with the top ten customers, particularly those related parties with significant transaction amounts, and reviewing significant new contracts to understand the contract terms to ensure there are no major abnormalities. The auditor also evaluates the reasonableness of accounting treatments for revenue recognition (including sales allowances and returns), assesses the effectiveness of internal control system design and implementation for revenue, and reviews customer delivery terms. Additionally, the auditor tests sales samples for a period before and after the year end to assess the accuracy of the timing of revenue recognition.

2. Valuation of inventories

Please refer to Notes 4(h) inventories, 5, as well as 6(e) inventories for details on accounting policy, judgments and major sources of estimation uncertainty, as well as disclosure on information about inventory valuation, respectively.

The Group recognizes a loss from the devaluation of inventories on a quarterly basis based on the lower of cost or net realizable value method. The international market price of DRAM has significantly affected the net realizable value of inventories. Therefore, the evaluation of inventory has been identified as a key audit matter in the consolidated financial statements.

The principal audit procedures performed to address the aforementioned key audit matter included review whether the allowances of inventory impairment and obsolescence losses are conducted in accordance with relevant standards, and assess whether the management's disclosure regarding inventory allowances is appropriate, and understanding the basis adopted by the management in the estimate of net realizable value, and sampling to test the reasonableness of the net realizable value.

Other Matter

The company has prepared its parent-company-only financial statements as of and for the years ended December 31, 2024 and 2023, on which we have issued an unmodified opinion.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers and IFRSs, IASs, IFRIC, SIC endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance (including the Audit Committee) are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. Furthermore, we remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audit resulting in this independent auditors' report are Kuo, Hsin-Yi and Lee, Tzu-Hui.
