Market Outlook(3Q'23)

Outlook

- DRAM demand declined sequentially since 2Q' 22 and bottoming in 2Q'23. Marginal to moderate demand rebound is expected in 2H'23, depending on the recovery strength in China domestic market, and US enterprise cloud market, and global economics.
- 2Q'23, Sign of inventory reduction in some DRAM suppliers but not all. All suppliers have adjusted capacity and capex. Improvement in Supply-demand balance is expected in 4Q23, subject to the strength in DDR4 destocking, DDR5 transition, and overall demand recovery.
- Lingering impact by geopolitical conflicts, including European war, and trade restriction between US and China, may continue

Supply

- DRAM Suppliers continuing adjusting capacity and product mix, overall supply decrease yearly is expected in 2023.
- DRAM capex cut significantly in 2023, which may extend into 2024.

Demand

- **Server Market:** AI-related servers is favorable for demand, however enterprise IT spending remains conservative. US enterprise cloud center is key to recovery
- **Mobile Market:** New smartphone in 2H'23 introduce higher DRAM content. The sales momentum of China's smartphones would be the key factor for recovery.
- **PC Market:** Inventory gradually returns to normal level, and 2H'23 shipments is expected to be better than 1H'23.
- **Consumer Market:** Demand for TV, IP CAM, networking, industrial and automotive applications are relatively healthy, resulting in potential recovery for respective consumer devices.
